At Southern Cattle Company we view this "On The Hoof Dispersal Sale" of our Charolais females and herd sires to be the first step towards the expansion of our overall Charolais program. We have implanted 600 +/- embryos out of these genetics and have additional embryos in the tank. With that huge genetic investment we felt as if it was time to offer our cow herd available for the benefit of others. Rest assured that we are as excited about the Southern Cattle Company Charolais program as ever and that we are taking what we feel to be the proper steps to achieve our goal which is: To produce and properly develop the ultimate Charolais bulls and genetics for our customers and the betterment of the greater beef industry period. I am eager to visit with you or show the cattle at any time from now until the sale.

Ken Stewart, SCC Manager
